

Fire Training Seminar

- **Open to all CBE graduate students, post-doctoral researchers, faculty and staff.**
- **This training should be completed on an annual basis. With ABET certification in the department this year, having your training up to date is especially important.**
- **You are encouraged to attend this seminar to get “checked off” on your annual fire training.**

This training is a lecture only. Hands-on training will be held April 10. If you have already completed your annual fire safety training online, it is not necessary to attend this session.

The Graduate Seminar Series events are part of the required curriculum for chemical engineering graduate students, but open to all Iowa State University graduate students, post-doctoral researchers, scientists, faculty and staff. See the full seminar schedule at cbe.iastate.edu/seminar-series/

**Thursday,
March 22, 2018
11:00 a.m.
171 Durham**
